Index.js

```js
express = require('express') const mongoose =
require ('mongoose'); const Product =
require('./models/product.model.js'); const app =
express() app.use(express.json());

//reading all products app.get('/', function (req,
res) { res.send("hello from the node api update");
    }); app.get('/api/products', async

    (req,res)=> {

     try { const products = await
        Product.find({});
        res.status(200).json(products);

        }catch(error){ res.status(500).json({message:
           error.message});

        }
    });

    //read api but by only one product
    app.get('/api/product/:id', async (req,res) =>{
    try{ const {id} = req.params; const product =
    await Product.findById(id); res.status(200).json(
    product );

     }   catch(error){   res.status(500).json({message:
     error.message}); }
    });

    //creat api
    app.post('/api/products',async (req,res)=>{ try{
    const product = await Product.create(req.body);
    res.status(200).json(product);
```

```javascript
        }catch (error){ res.status(500).json({message:
         error.message });
        }
        });

        //update a product app.put('/api/product/:id',
        async (req,res) => { try { const{id} =
        req.params;

                const product = await Product.findByIdAndUpdate(id ,
req.body);
                if(!product){ return res.status(404).json({message:"Product
                  not found"});
                }

                 const updatedProduct = await Product.findById(id);
                  res.status(200).json(updatedProduct);

        }catch(error){ res.status(500).json({message:
        error.message }); }
        });

        //delete a product

        app.delete("/api/product/:id",  async(req,res)=>{
          try{ const{id}= req.params;
            const product = await Product.findByIdAndDelete(id); if
            (!product){
              return res.status(404).json({message: "Product not found"});
            } res.status(200).json({message:"Product deleted

            successfully"});

          }catch(error){ res.status(500).json({message:
          error.message }); }
        } )
```

```
    //here first i connected db and then listened to the port

    mongoose.connect("mongodb+srv://akashvaddi333:K5m18vy6fB6aU7K2@cluster0.h
p9gamr.mongodb.net/Node-API?retryWrites=true&w=majority&appName=Cluster0")
 .then(()      =>     {console.log('Connected!');
 app.listen(3000, () =>{ console.log('server is
 running on port 3000') });

});
```
